"As a metropolitan complement to our global resort portfolio, The Marriott Vacation Clubs City Collection brings our Owners, Members and guests to the city – and the city to our Owners, Members and guests – by offering stylish stays that are in

the heart of local interests, transportation and attractions, reflecting the spirit and culture of their dynamic surroundings," said Lori Gustafson, Chief Membership & Commercial Services Officer at Marriott Vacations Worldwide. "We know our Owners, Members and guests see great value in being close to the action, so we will continue to look for opportunities to expand our city offerings over the coming years."

The Marriott Vacation Clubs has also announced plans to add the first two Westin Vacation Club properties to its City Collection portfolio. Expected to begin development in 2025, a newly proposed 50-unit property in Charleston, South Carolina overlooking the heart of the city will include a new on-site sales gallery. With the city of Charleston continually ranking on lists of the South's best cities to visit for its thriving culinary scene, easy walkability and southern charm, this new property, located steps from the historic Charleston City Market, will bring the city experience right to Owners, Members and guest's doorsteps. In 2026, a new proposed property in Savannah, Georgia is expected to break ground in the heart of the popular historic downtown district and will also include a sales gallery. These properties are anticipated to make great additions to the City Collection portfolio and offer two new, unique destinations for Owners, Members and guests.

Stylish Accommodations

The guestrooms and suites at City Collection properties echo the cosmopolitan nature of their surroundings, each with an updated, modern look and feel that reflects the personal energy and unique culture of its host city. Because the action is found outside the property—in the city and the neighborhoods—the stylish guestrooms and suites, featuring premium bedding and bath amenities, are designed for shorter, more active stays.
